About

Mid-level Backend Developer

Over three years of software engineering experience in analysis, design, development, debugging, implementation, and maintenance of various scalable client-server architecture web applications using Python, Django, DRF, HTML, CSS, and Bootstrap.

Experience

Oct 2021 – Present
Khoy, Iran

Backend Developer

- Designed, developed, and debugged robust **Web Applications** and **RESTful APIs** using Django and DRF
- Proficient in **Django and DRF basics**
- Built and maintained **SQL** and **NoSQL** databases and data models using **SQLite, MongoDB,** and **PostgreSQL**
- Implemented a comprehensive **User Management System** for user registration, authentication, and authorization
- Developed an efficient **Email Backend** for various purposes such as verifications, notifications, and password resets
- Experienced in utilizing the **Django Template Engine** along with web technologies like **HTML**, **CSS,** and **Bootstrap** to create visually appealing interfaces
- Deployed projects on **Linux Servers** using **Docker** for containerization, along with **Nginx** as a reverse proxy server and **Gunicorn** as the application server
- Familiarity with caching tools such as **Redis** and **Celery** to optimize performance

Feb 2021 – Present
Khoy, Iran

Python Developer

- Proficient in **Python basics**
- Strong knowledge of **Data Structures** to manage and manipulate complex sets of data efficiently
- Experienced with **Object-Oriented Programming (OOP) concepts**
- Deep understanding of various **Design Patterns** to architect robust and flexible systems
- Utilized **Python Exception-handling** techniques to handle errors and prevent application crashes gracefully
- Expertise in **Debugging** to identify and resolve issues, ensuring applications are running swiftly
- Familiarity with deploying **Packages** to leverage existing **Libraries and Frameworks** effectively
- Integrated **Third-party Tools** into projects to optimize time and effort

Projects

May 2025 – Present

eCommerce Shop ⬈

This project is still in the development phase and will have these sections:
- Product Listings – Items for sale with descriptions, prices, and images.
- Shopping Cart & Checkout – A system for customers to add products and complete purchases.
- Payment Integration – Accepts payments via credit/debit cards, PayPal, or other online methods.
- Order & Shipping Management – Tracks purchases and shipments.
- User Accounts – Allows customers to create profiles, view order history, and manage details.

Oct 2021 – Present

Django Sample ⬈

This project has been developed in these sections:
- Account management system to handle different types of users.
- Blog system for posting VIP and Ordinary articles.
- Email backend system for various purposes of the project.
- API system will also be added to the project soon.

For more details, check the **Portfolio page on the website.** ⬈

Technical Skills

Programming – Python, SQL | **Frameworks** – Django, DRF, Bootstrap | **Databases** – PostgreSQL, MongoDB, SQLite, Redis | **Architectures & Design Patterns** – Client-Server, Microservice, Monolithic, MVC, MVT | **Container Platform** – Docker | **Operating Systems** – GNU/Linux, Windows | **Web** – HTML, CSS | **Version Controller** – Git, GitHub | **Servers** – Nginx, Gunicorn | **Tools** – Visual Studio Code | **Others** – Agile Scrum Methodology, JWT Authentication, Celery, Clean Code

Education

Oct 2019 – Feb 2023
Khoy, Iran

Bachelor of Computer Software Engineering, Azad University
Graduated with an overall "**A**" grade in this academic field, demonstrating a solid commitment to excellence in education.
